DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on July 13, 2006 has been entered. Claims 4, 7, 8, 10, 11, 13-18 and 20 have been amended. Claim 12 has been cancelled. Claim 21 has been added. Claims 1-11 and 13-21 are still pending in this application, with claims 1, 4 and 20 being independent. Claims 1-3 have been withdrawn as directed to a non-elected invention.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Richard M. Beck (Reg. No. 22,580) on August 2, 2006.

3. The application has been amended as follows: CLAIMS 1-3 HAVE BEEN CANCELLED.

Allowable Subject Matter

4. Claims 4-11 and 13-21 are allowed.

5. The following is an examiner's statement of reasons for allowance:

Applicant teaches a vehicle wheel illumination system including a housing constructed and arranged to rotate with the vehicle wheel, substantially stationary lighting means and control means positioned within a cavity of the housing, such housing also including window means for directing light from the lighting means onto the vehicle wheel. The substantially stationary control means is constructed and arranged to flash the lighting means at given frequency.

PEARSALL et al. (U.S. Pat. 4,775,919) discloses a vehicle wheel illumination system having a plurality of circularly arranged LED, powered by a power generating arrangement driven by the rotation of the vehicle wheel, such LED flashing in response to the rotational speed of the wheel. However, the cited reference fails to individually disclose, or even suggest, the specific substantially stationary lighting means and control means claimed by the instant invention.

No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically the substantially stationary lighting means and control means claimed by the instant invention, in combination with the claimed vehicle illumination system housing.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
